AVEVA™

AVEVA INSIGHT

Turn Industrial Data Into Powerful, Actionable Insights

AVEVA Insight is a secure, managed solution for gathering, storing, visualising and analysing data. This cost-effective cloud solution makes for smarter business decisions and consolidation of disparate data to enable end users to see the entire picture when it comes to operational performance. All of this data is made available throughout your enterprise to allow secure access from absolutely anywhere. If you are looking for the shortest, most economical route to the big-time benefits of advanced industrial information management, you have found it.

The Insight Difference

AVEVA Insight is an economical software-as-a-service platform that allows you to readily discover valuable insights within your organisation. Unlike other services, it requires no additional IT, staffing or infrastructure with our cloud based applications and data storage. We make it simple for you with an annual subscription model and easy set up.

Real time data collection made easy

Quickly get started collecting and storing high fidelity, time-series data from multiple, disparate sensors and smart devices within the secure cloud. Authorised users receive easily understandable power analysis and intelligent reporting tools via web or mobile. All of this, right when you need it, whenever you need it. It is that simple.

Performance management

Collect equipment downtime event and production data from your plants through edge devices, or manual data entry. Empower operators and engineers to drive performance improvements with visibility of equipment efficiency KPI's in real time and asset utilisation root cause analyses. Standardise and share best practices in the cloud.

Advanced reporting and analyses

Your business decisions will be made both faster and more informed given a responsive newsfeed and alerts on up-to-date intelligence. Use this information to create time-series and event data into intuitive charts and dashboards for web and mobile devices to initiate action by the right person at the right time.

In a Nutshell

Using AVEVA Insight, you no longer need to worry about the ins and outs of data collection and storage. Simply hone in on interpreting your results and using them to improve operations.

Eliminate investments in hardware servers, maintenance and software upgrades with our cloud solutions. The annual subscription model offers a scalable approach to suit growth.

Consolidate: Integrate content from multiple data sources using a single, cloud-based system

Large Capacity: Handle millions of tags and unlimited users, providing immeasurable capability

Access Everywhere: Powerful analysis and reporting tools deliver visualisation to web or mobile devices anywhere, anytime

Collaborate: Share plant operations insights and best practices across the enterprise

Stay Current: The Software as a Service is continuously kept up-to-date and allows for updates to be managed seamlessly in the cloud

Security: Safe, secure and reliable powered by Microsoft Azure's proven cloud technology

Excellent for OEMs and Solution Builders

Insight is a fantastic way to provide customers with a value added solution to help them make the most of your system's capabilities. It will enable them to fully utilise the powerful performance that your solution offers, while at the same time giving you the added benefit of improved troubleshooting and warranty investigation. Let your customers rest easy knowing that their information is safe with the use of secure data authorisation, authentication and encryption.
